

DDC Advocacy's Virtual Town Hall Service

EDUCATE, ENGAGE, AND EMPOWER YOUR STAKEHOLDERS

Getting your stakeholders together can be the most effective way to educate them about issues, get their feedback and buy-in, motivate them to take action, and thank them for their efforts. But when they are spread out in different facilities or across the country, how can you bring them all together?

Utilizing an advanced Web-based platform, Virtual Town Hall events provide a sophisticated tool for connecting with your target audience. The service lets you maintain control of your message and capture valuable feedback at a fraction of the cost—and without the logistical difficulties—of in-person events.

A VERSATILE OUTREACH PLATFORM

Experience has taught us that no two clients are the same. That's why our Virtual Town Hall service has enough flexibility to accommodate any audience—large or small, general or targeted—and to permit a variety of uses:

- **Education**

Virtual Town Hall events offer an ideal platform for getting the word out to a limitless number of participants about any topic—whether you're mobilizing grassroots advocates, informing members about important issues, training, or giving progress updates.

- **Incentive**

A great way to give back to stakeholders, Virtual Town Hall events offer an opportunity for your audience to feel like they belong to a privileged community.

- **Research**

With realtime reporting features and polling options, Virtual Town Hall events can be a highly useful tool for getting comments and reactions from your stakeholders.

MANAGE THE CONVERSATION

Virtual Town Hall events can help your stakeholders truly feel involved in your organization's political initiatives, while allowing you to maintain control of the process. Our service enables you to:

- Pre-screen and queue questions from participants, ensuring that you can always manage the conversation.
- Conduct realtime polls to gather feedback and opinions from participants instantly.
- Utilize private text chatting to coordinate the event behind the scenes.
- Capture and store detailed participation data.
- Record additional questions or comments from participants via voicemail.
